

The attached submission is for proposed renovations at Scotland Yard. The currently proposed renovations are designed to amend the field of play support future work at Scotland Yard that could include a new main entry, new grandstands and press box, new concessions, and new restroom facilities. The current proposed renovations include:

- Adjustment to the dimensions of the playing surface.
- Relocation of the bull pens.
- Replacement of the artificial turf.
- Replacement of sections of the existing netting along 1<sup>st</sup> and 3<sup>rd</sup> base lines to extend the netting from 50' to 60' height above the playing surface.
- Relocation of the free-standing bleachers to the new viewing areas along the 1<sup>st</sup> and 3<sup>rd</sup> base lines.
- Addition of a single user restroom building along the 1<sup>st</sup> base line attached to the dugout.
- Relocating the existing metal storage building to provide additional spectator areas.
- Altering the landscaping requirements along Douglas Ave.
- Removing the landscape requirements along Lovers Ln.
- Interior refresh of existing bathrooms along the 3<sup>rd</sup> base line.
