Hello Elizabeth,

There is a \$6.50 spread charge built into that quote. For a load delivered to your silo, subtract \$6.50 per ton. That is \$116.73 per ton delivered to silo. Be sure that when they order the load that they specify that the cement will be delivered to a silo and not spread. Please let me know if you have any other questions. Thanks!

Ben

Hi Ben,

I have another question. If we needed to have the cement blown into our silo at 2525 University instead of being spread – would the \$123.23/ton pricing be affected?

Thanks,

Elizabeth T. Anderson

Subject: Ash Grove Cement Pricing

Hello Elizabeth,

I am sending this e-mail to confirm the pricing for Portland T-I/II cement to your location: 2525 University Blvd., Dallas, TX 75206. The pricing set forth in the Tarrant County Portland Cement Contract of \$123.23 per ton delivered and spread will apply. Please keep in mind that for loads less than 25 tons, a short load fee will be charged consisting of the base freight rate plus fuel surcharge for the tonnage less than 25. If you have any questions, please don't hesitate to ask. Thanks and have a great day!

Ben
