**Subject:** Snider Plaza - SUE

Good Morning Jodie,

The purpose of the subsurface utility engineering (or SUE) is to conduct exploration of utilities in order to reduce risk in construction (which could lead to lower bids); conflicts found in the field are generally more expensive than if designed to accommodate beforehand. Due to the nature of the project, it is recommended that we conduct SUE on the Snider Plaza project to increase the success of the project. To conduct the SUE, we recommend using The Rios Group.

The Rios Group has provided SUE Engineering Services on over 100 projects in the past 5+ years. Pacheco Koch has teamed with TRG on projects for the following entities: City of Dallas, TxDOT, City of Fort Worth, Fort Worth ISD, City of Irving, City of Carrollton, Dallas ISD and others. We have provided seamless SUE Surveying support on all of those projects. Pacheco Koch also provides direct surveying support for TRG projects for other design firms. TRG and PK staff are accustomed to working together to provide timely and accurate professional services to all clients.

Please feel free to call or email me should you have any questions.

Thanks,

**Eric Swartz, PE**
